

Festoon kits

3 hours emergency

Same/next day delivery

Why use festoon lighting?

Whether you're managing a construction site, an event, or any other work environment, festoon lighting ensures a well-lit and secure site, promoting safety and productivity for your workforce.

50m festoon

Convenient and robust!

Their robust and durable design lets you place them across the entire site, no matter the conditions, and they can be easily fixed to various structures.

Built for larger projects

Designed for multi-storey buildings and expansive outdoor areas that demand extensive lighting coverage – the reach to cover greater distances and heights, with 20 LED heads on every kit.

50m emergency festoon

SPECIFICATION

50m festoon

Input	AC 110-130V 50/60Hz
Length	50 metres
Wattage	20 × 6.5W
Colour temperature	6400K
Plug	3-pin 16A

Emergency festoon

Input	AC 110-240V 50/60Hz
Output	DC 36-40V
Wattage	130W (max)
Emergency output	10% of initial output for 3 hours

The first-ever emergency festoons in the UK

They switch to emergency mode when mains power is lost, giving 3 hours of emergency light at 10% of initial output – perfect for stairwells and safe exits.
