

POWERDROP RANGE

Don't bin it. Rewire it.

Eco-friendly powerdrops with a fully recyclable design, featuring 16A sockets/couplers at 5m or 10m spacings. At the end of the job, cut the cable either side of the drop and return it to us to be rewired – we'll even repair any damage as part of the process.

On average 70% saving

5m or 10m spacings

Wired & tested in the UK

Same/next day

- Innovative, recyclable powerdrop for cost reduction
- We can arrange collection to remake and deliver it back within a week
- Ideal for large construction sites, and can be suspended, minimising trip hazards
- Suitable for power tools and lights
- 2.5mm arctic cable with a choice of 1.5mm yellow arctic drop lengths
- Standard 100m lengths, with 50m bags available on request
- Single 16A 110V twist-to-lock socket on each drop
- Plastic quarter turn screws for simplified access
